

Problem Specification

This project is to manage the export activities of the organization, which exports different kind of goods to their customers across the globe. The application should provide customers to order for the goods from any part of the world. Customers are registered organizations or firms in their countries. Every new customer has to register as a user to the site. The application should provide the different levels of authentication. The goods can be sent to the customers by any means e.g. by air, road etc. The Performa Invoice and Documents Delivery Details should also be maintained by the application. The project has been planned to be having the view of distributed architecture, with centralized storage of the database. The application for the storage of the data has been planned. Using the constructs of MS-SQL Server and all the user interfaces has been designed using the ASP.Net technologies. The database connectivity is planned using the “SQL Connection” methodology. The standards of security and data protective mechanism have been given a big choice for proper usage. The application takes care of different modules and their associated reports which are produced as per the applicable strategies and standards that are put forwarded by the administrative staff.

PURPOSE OF THE PROJECT

The proposed application need to be developed to cater services to customer across the globe with similar quality and timeliness. This application is also required to show case the range of services which are there with the company to get the customer attention to maximum extent. Apart from getting business from customer the application should also keep track of order information, payments information etc. Most of the mentioned features are there as part of the current application. Some of the features will be added in the future, and hence they are referred as future enhancements.

Project Task

Export Management System is a web based application to manage the export activities of an organization.

For better management and coordination with export activities, we have to implement some concepts. They are

- ✓ Registration
- ✓ Login
- ✓ Supplier Details
- ✓ Order Details
- ✓ Invoice Details
- ✓ Revenue Reports
