

## **Problem Specification**

We are going to develop Staff Feedback System to provide feedback in an easy and quick manner to the college principal and Hod's. So we call it as Staff Feedback System which delivers via the staff interface as online system which acting as a Service Provide.

By using this technology we can make fast feedback about staff by the students in time to head of departments as they can refer in online system.

This project has four kinds of users. Student, Staff, Hod's, and Principal. The student can give feedback in online system provided by college staff. First of staff can prepare questions & add, update these questions to the online system. After that it can be viewed by the students and can give feedback about the lecturers.

- ✓ Student module
- ✓ Staff module
- ✓ Head of the departments module
- ✓ Principal module

### **Student Module:-**

The student must register and then he/she can login the registered student are allowed to give the feedback about the staff, in form provided by the staff.

### **Staff Module:-**

The staff can login with his username and password and can check his feedback and he can insert, update the questions in feedback page.

### **HOD Module:-**

The HOD also registers and then he/she will login into system feedback. The HOD is allowed to check the feedback of staff.

### **Principal Module:-**

The principal can view the last result of the Staff Feedback System, by seeing the feedback he can easily find the lecturer teaching status in the college.

## **Objective of the project**

It reduces the human effort by making everything computerized. This Application works in Multiple PC's installed on multiple Computers but sharing same database by which users of different department can use it sitting at different locations simultaneously. But in the future we can publish this application in web. Hence it works more Convenient. The main reason for choosing this topic is to reduce the time and complexity of maintaining the records.

- Manage the entire process of staff management
- Enhance the manual reports to be automated
- Meet high quality standards and flexibility to handle by everyone
- Save your time and cost.

## **Project Task**

Feedback system is useful for collecting the feedback from various users of an organization. It helps us to offer better services to deserving people of an organization.

This application will keep record of various feed backs from time to time.

- ✓ Registration
- ✓ Login
- ✓ Feedback details
- ✓ Action Taken
- ✓ History of Feedback
- ✓ Suggestions to better outcome
